CORE COMPETENCIES

Northeast Infrastructure, LLC, a **SDVOSB**, assists the Department of Veterans Affairs to care for America’s Veterans. NEI assists VA Medical Centers become **Directive 1061** compliant by providing services to prevent *Legionella* Disease from Potable Water Distribution systems in VHA buildings.

Legionella Services:

- Water Mapping
- Dead Leg Identification
- Plumbing Design
- As-built documentation

PAST PERFORMANCE

Cross Connection Survey | VAMC Fayetteville, AR | Solicitation No: VA256-16-R-0381

Project is a field study to **identify all cross connects and dead legs on the domestic water distribution lines** and provide record drawings of plumbing systems at the Fayetteville VAMC. The SOW includes a complete survey and identification of all potential or actual cross connections. The project will adhere to VHA Directive 1061. The study will produce a full set of record plumbing drawings depicting existing layout of the entire domestic water system consisting of 37 buildings. **Total SF: 705,291**
Point of Contact: *Lee Warren* · (479) 444-5091 · edwin.warren@va.gov
